

IAS includes both a client and a server. The IAS Server specifications are detailed below.

IAS Server Version 2.1 Specification	
Operating Systems	Red Hat® 5.x (Linux 2.x), Windows® XP, Windows® 7, Solaris 10
Application Servers	JBoss 6.0.0 Final, GlassFish 3.1.1
Java	Java JDK 1.5 +
Databases	PostgreSQL, Oracle®, MySQL™

The IAS server software distribution is dependent on both the operating system and the application, so these must be specified when ordering the product.

Instructions and wizards for configuring IAS to operate with the databases specified above are included with the product distribution. IAS also supports the databases native to the Application Servers.

The IAS server can stream the following image formats: NITF2.1 C8, GMLJP2, and GeoJP2.

The IAS Client includes a combination of Java and native (operating system specific code). The IAS Client specifications are detailed below:

IAS Client Version 2.1 Specification	
Operating Systems	Windows® XP, Red Hat® 5 (Linux 2.x), Solaris 10
Java	Java JDK 1.5 +
